INDEX TO VOLUME LI

ACACIA and associated colloids, action of, 195.

Acidosis a criterion of surgical shock, 191.

Adrenalin. *See Epinephrin.*

Adrenalin chloride, effect of subcutaneous injection of, on heat production, blood pressure and pulse rate, 200.

Adrenals and experimental hyperglycemia, 366.

Air, dry and moist, effect of breathing, 191.

Alkali reserve of blood, lymph and spinal fluid, 551.

Alpha and beta rays, physiological effects of, 189.

American Physiological Society, Proceedings, 174.

ANDREWS, V. L. See GIVENS, ANDREWS and MCCLUGAGE, 199.

Atropine, antagonism of, to gastrin bodies, 469.

BACKUS, P. L. See COLLIP and BACKUS, 551, 568.

BALDWIN, F. M. Susceptible and resistant phases of the dividing sea-urchin egg when subjected to various concentrations of lipoid-soluble substances, especially the higher alcohols, 190.

BECHT, F. C. Studies on the cerebrospinal fluid, 1.

—— and P. M. MATILL. Studies on the cerebrospinal fluid, 126.

BELT, A. E. See HOOPER, SMITH, BELT and WHIPPLE, 205.

BERGEIM, O. See MILLER, FOWLER, BERGEIM, REHFUSS and HAWK, 332.

Beta rays, alpha and, physiological effects of, 189.

Bile formation, influence of internal secretions on, 193.

BLEILE, A. M. and C. BROOKS. Further results on the physics of sphygmography, 192.

Blood, alkali reserve of, 551.

—— and circulation in shock, some effects of ether and morphine on, 197.

—— cell counts, effect of splenic extract on, 279.

—— in clinical shock, 194.

—— pressure, effect of adrenalin chloride on, 200, 407.

—— ——, influence of internal secretions on, 193.

—— —— observations, capillary, 196.

—— ——, venous, influence of low oxygen tensions on, 180.

——, rate of oxygen absorption by, 195.

—— volume, 205, 221, 232, 257.

BOOTHBY, W. M. and I. SANDIFORD. The effect of the subcutaneous injection of adrenalin chloride on the heat production, blood pressure and pulse rate in man, 200.

BROOKS, C. See BLEILE and BROOKS, 192.

BULGER, H. A. and P. G. STILES. The comparative performance of muscles subjected to rhythmic and arhythmic stimulation, 430.

BURBAGE, S. R. See DRESBACH, SUTTON and BURBAGE, 188.

BURGE, W. E. The rôle of catalase in the animal organism, 202.

BURNETT, T. C. Some remarks on catalase, 184.

BYRNE, J. Paradoxical pupil dilatation following afferent path lesions, 188.

CAMPBELL, JR., W. A. See SNYDER and CAMPBELL, 199.
Capillary blood pressure observations, 196.
Carbohydrate diet, effect of, on pancreas function, 423.
Carbon dioxide, physiological action of, 321.
CARLSON, A. J. See JENSEN and CARLSON, 423.
Cassiopea, effect of oxygen on nerve conduction in, 543.
Catalase in animal organism, 202.
——, relation of, to heart activity, 182, 525.
——, some remarks on, 184.
CATTELL, McK. Some effects of ether and morphine on the blood and circulation in shock, 197.
Central nervous system, relation of, to epinephrin secretion, 175.
Cerebrospinal fluid, studies on, 1, 126.
CHAMBERS, R. Microdissection studies on the fertilization of the starfish egg, 189.
CHILLINGWORTH, F. P. and R. HOPKINS. Physiologic changes produced by variations in lung distention. II. Efficiency of the pulmonary circulation in overcoming obstruction, 289.
Circulation, responses of, to low oxygen tension, 181.
COLLIP, J. B. and P. L. BACKUS. The alkali reserve of the blood plasma, spinal fluid and lymph, 551.
—— —— ——. The effect of prolonged hyperpnoea on the carbon dioxide combining power of the plasma, the carbon dioxide tension of alveolar air and the excretion of acid and basic phosphate and ammonia by the kidney, 568.
Colloids, injection of, into circulation, and change in serum refractive index, 257.
COPE, O. M. See LOMBARD and COPE, 174.
Cypridina, is the luminescence of, an oxidation? 580.
DANZER, C. S. See HOOKER and DANZER, 196.
DAVIS, N. C. See McQUARRIE and DAVIS, 257.
DAWSON, A. B., H. M. EVANS and G. H. WHIPPLE. Blood volume studies. III. Behavior of large series of dyes introduced into the circulating blood, 232.
DOWNS, A. W. The influence of internal secretions on blood pressure and the formation of bile, 193.
—— and N. B. EDDY. The influence of splenic extract on the number of corpuscles in the circulating blood, 279.
DRESBACH, M., J. E. SUTTON, JR. and S. R. BURBAGE. Some observations on dark adaptation of the peripheral retina, 188.
Duodenum, removal of, 182.
EDDY, N. B. See DOWNS and EDDY, 279.
Edema, relation of protein deficiency to, 185, 378.
Electron tube amplification with the string galvanometer, 177.
Emphysema, chronic pulmonary, pathological physiology of, 178.
Epinephrin in perfusates of various H-ion concentration, vascular reaction to, 199.
—— output, relation of spinal cord to, 484.
——, reactions to subcutaneous injection of, 407.
—— secretion, relation of central nervous system to, 175.
EVANS, H. M. See DAWSON, EVANS and WHIPPLE, 232.
EYSTER, J. A. E. See MEEK and EYSTER, 180, 303.
FERTILIZATION of starfish egg, microdissection studies on, 189.
Fireflies, flashing interval of, 536.
FORBES, A. and C. THACHER. Electron tube amplification with the string galvanometer, 177.

FOWLER, H. L. See MILLER, FOWLER, BERGEIM, REHFUSS and HAWK, 332.
FRIES, J. A. The respiratory quotient and its uncertainty, 202.

GAR roe, chemistry of, 198.
Gastric response to vegetables, 332.
Gastrin studies, 454, 469.
Genito-urinary organs, isolated, action of prostatic extracts on, 203.
GILBERT, N. C. See GREENE and GILBERT, 181.
GIVENS, M. H., V. L. ANDREWS and H. B. MCCLUGAGE. The excretion of a red pigment in the sweat of man, 199.
Glutamine production, effect of, on urinary nitrogen, 202.
GOLDMAN, A. See MUDD, GRANT and GOLDMAN, 184.
GRANT, S. B. See MUDD, GRANT and GOLDMAN, 184.
GREENE, C. W. and N. C. GILBERT. Studies on the responses of the circulation to low oxygen tension. II. The electrocardiogram during extreme oxygen-want, 181.
—— and E. E. NELSON. The chemistry of gar roe, 198.
GREISHEIMER, E. See LYON and GREISHEIMER, 191.
GUTHRIE, C. C. See MCELLROY and GUTHRIE, 195.
——. See WEIL and GUTHRIE, 194.

HAGGARD, H. W. See HENDERSON and HAGGARD, 176.
HAMMETT, F. S., C. A. PATTEN and N. SUITSU. A physiological response to pituitary administration, 588.
HARVEY, E. N. Is the luminescence of Cypridina an oxidation? 580.
HAWK, P. B. See MILLER, FOWLER, BERGEIM, REHFUSS and HAWK, 332.
Heart activity, relation of catalase to, 182, 525.
—— cycle, time relations of, as shown by carotid pulse, 174.
Heart, mammalian, effects of warming and cooling sino-auricular node in, 201.
Heat production, effect of adrenalin chloride on, 200.
—— ——, —— —— subcutaneous injection of adrenalin on, 407.
—— —— in turtle's cardia in response to stimulus through vagus nerve, 183.
Hemato-respiratory function, influence of oxygen deficiency on, 176.
Hemorrhage, circulatory reactions to, 180.
HENDERSON, Y. and H. W. HAGGARD. The influence of oxygen deficiency and related conditions upon the hemato-respiratory functions, 176.
HOOKER, D. R. and C. S. DANZER. Observations on the capillary blood pressure in man with presentation of a new method, 196.
HOOPER, C. W., H. P. SMITH, A. E. BELT and G. H. WHIPPLE. Blood volume studies. I. Experimental control of a dye blood volume method, 205.
HOPKINS, R. See CHILLINGWORTH and HOPKINS, 289.
Hyperglycemia, experimental, adrenals and, 366.
Hyperpnoea, prolonged, effect of, in man, 568.

INTERNAL secretions, influence of, on blood pressure and formation of bile, 193.
IVY, A. C. The rôle of the vagi and splanchnic nerves in the genesis of shock from abdominal operations, 197.

JACOBS, M. H. To what extent are the physiological effects of carbon dioxide due to hydrogen ions? 321.
JENSEN, V. W. and A. J. CARLSON. The apparent influence of a diet of carbohydrates on the pancreas remnant of partially pancreatectomized dogs, 423.

KEETON, R. W., F. C. KOCH and A. B. LUCKHARDT. Gastrin studies. III. The response of the stomach mucosa of various animals to gastrin bodies, 454.

——, A. B. LUCKHARDT and F. C. KOCH. Gastrin studies. IV. The response of the stomach mucosa to food and gastrin bodies as influenced by atropine, 469.

KOCH, F. C. See KEETON, KOCH and LUCKHARDT, 454.

——. See KEETON, LUCKHARDT and KOCH, 469.

KOHMAN, E. A. The experimental production of edema as related to protein deficiency, 185, 378.

KRUSE, T. Further studies on the action of acacia and associated colloids, 195.

——. The interpretation of certain muscle phenomena in terms of "all or none," 182.

LAMB, A. R. See NELSON and LAMB, 530.

LOMBARD, W. P. and O. M. COPE. The time relations of the heart cycle as shown by the carotid pulse of man, 174.

LUCKHARDT, A. B., M. SHERMAN and W. B. SERBIN. On the origin of the muscular tremors, clonic and tonic spasms in parathyroid tetany, 187.

——. See KEETON, KOCH and LUCKHARDT, 454.

——. See KEETON, LUCKHARDT and KOCH, 469.

Luminescence of Cypridina, 580.

Lung distention, physiologic changes caused by variations in, 289.

Lungs, circulation in, 289.

Lymph, alkali reserve of, 551.

LYON, E. P. and E. GREISHEIMER. Effect of breathing dry and moist air, 191.

MCCLUGAGE, H. B. See GIVENS, ANDREWS and MCCLUGAGE, 199.

MCELLROY, W. S. and C. C. GUTHRIE. A method for determining the rate of oxygen absorption by blood, 195.

MCQUARRIE, I. and N. C. DAVIS. Blood volume studies. IV. Blood volume as determined by the change in refractivity of the serum nonprotein fraction after injection of certain colloids into the circulation, 257.

MACHT, D. I. and S. MATSUMOTO. The action of prostatic extracts on isolated genito-urinary organs, 203.

MANN, F. C. Removal of the duodenum, 182.

MATILL, P. M. See BECHT and MATILL, 126.

MATSUMOTO, S. See MACHT and MATSUMOTO, 203.

MAYOR, A. G. Effect of diminished oxygen upon rate of nerve conduction in Cassiopea, 543.

MEEK, W. J. and J. A. E. EYSTER. Circulatory reactions to hemorrhage, 180.

—— —— ——. Experiments on the pathological physiology of acute phosgene poisoning, 303.

Microdissection studies, 189.

MILLER, R. J., H. L. FOWLER, O. BERGEIM, M. E. REHFUSS and P. B. HAWK. The gastric response to foods. VII. The response of the normal human stomach to vegetables prepared in different ways, 332.

MUDD, S., S. B. GRANT and A. GOLDMAN. Further studies on excitation of infections of the throat, 184.

Muscle phenomena, interpretation of, in terms of "all or none," 182.

——, work under rhythmic and arhythmic stimulation, 430.

NAGAYAMA, T. Renal activity and the acid base equilibrium, 434.
——. The urea excreting activity of the kidney and phosphate excretion, 449.
NELSON, E. E. See GREENE and NELSON, 198.
NELSON, V. E. and A. R. LAMB. The effect of vitamine deficiency on various species of animals. I. The production of xerophthalmia in the rabbit, 530.
Nerve conduction in Cassiopea, effect of oxygen on, 543.
Nitrogen, urinary, effect of glutamine production on, 202.

OXYGEN absorption by blood, rate of, 195.
—— deficiency, influence of, on hemato-respiratory functions, 176.
——, effect of, on nerve conduction in Cassiopea, 543.
—— tensions, low, influence of, on venous blood pressure, 180.
Oxygen-want, extreme, electrocardiogram during, 181.

PANCREAS function, effect of carbohydrate diet on, 423.
Parathyroid tetany, muscular tremors, clonic and tonic spasms in, 187.
PATTEN, C. A. See HAMMETT, PATTEN and SUITSU, 588.
Phosgene poisoning, acute, 303.
Phosphate excretion, urea and, by kidney, 449.
Physical efficiency tests used by the Royal Air Force of England, 179.
Pituitary ingestion, physiological response to, 588.
Prostatic extracts, action of, on isolated genito-urinary organs, 203.
Protein deficiency and experimental edema, 185, 378.
Pulse rate, effect of adrenalin chloride on, 200, 407.
Pupil dilatation, paradoxical, following afferent path lesions, 188.

RAYMUND, B. Acidosis a criterion of surgical shock, 191.
REDFIELD, A. C. A comparison of the physiological effects of alpha and beta rays, 189.
REHFUSS, M. E. See MILLER, FOWLER, BERGEIM, REHFUSS and HAWK, 332.
Renal activity and the acid base equilibrium, 434.
Respiration of dry and moist air, 191.
Respiratory quotient and its uncertainty, 202.
Retina, peripheral, dark adaptation of, 188.
ROGOFF, J. M. See STEWART and ROGOFF, 175, 366, 484.

SANDIFORD, I. The effect of the subcutaneous injection of adrenalin chlorid on the heat production, blood pressure and pulse rate in man, 407.
——. See BOOTHBY and SANDIFORD, 200.
SCHLOMOVITZ, B. H. Further experiments on the effects of warming and cooling the sino-auricular node in the mammalian heart, 201.
SCHNEIDER, E. C. Observations on the physical efficiency tests used by the Royal Air Force of England, 179.
——. The influence of low oxygen tensions on venous blood pressure in man, 180.
SCOTT, R. W. Observations on the pathological physiology of chronic pulmonary emphysema, 178.
Sea-urchin egg, susceptible and resistant phases of, when subjected to various concentrations of lipoid-soluble substances, 190.
SERBIN, W. B. See LUCKHARDT, SHERMAN and SERBIN, 187.

SEYMOUR, R. J. Relation of catalase to heart activity, 182, 525.
SHERMAN, M. See LUCKHARDT, SHERMAN and SERBIN, 187.
SHERWIN, C. P., W. WOLF and M. WOLF. Effect of glutamine production on urinary nitrogen, 202.
Shock, clinical, the blood in, 194.
—— from abdominal operations, vagi and splanchnic nerves in, 197.
——, some effects of ether and morphine on blood and circulation in, 197.
——, surgical, acidosis a criterion of, 191.
Sino-auricular node in mammalian heart, effects of warming and cooling, 201.
SMITH, H. P. Blood volume studies. II. Repeated determination of blood volume at short intervals by means of the dye method, 221.
——. See HOOPER, SMITH, BELT and WHIPPLE, 205.
Smooth muscle, heat production in, 183.
SNYDER, A. v't H. See SNYDER and SNYDER, 536.
SNYDER, C. D. Heat production in turtle's cardia in response to stimulus through vagus nerve, 183.
—— and W. A. CAMPBELL, JR. Vascular reaction to epinephrin in perfusates of various H-ion concentration, 199.
—— and A. v't H. SNYDER. The flashing interval of fireflies—its temperature coefficient—an explanation of synchronous flashing, 536.
Sphygmography, results on physics of, 192.
Spinal cord, relation of, to epinephrin output, 484.
—— fluid, alkali reserve of, 551.
Splanchnic nerves, vagi and, rôle of, in shock from abdominal operations, 197.
Splenic extract, effect of, on blood cell counts, 279.
STEWART, G. N. and J. M. ROGOFF. Further observations on the relation of the adrenals to certain experimental hyperglycemias (ether and asphyxia), 366.
—— —— ——. Further observations on the relation of the central nervous system to epinephrin secretion, 175.
—— —— ——. Further observations on the relation of the spinal cord to the spontaneous liberation of epinephrin from the adrenals, and the action of strychnine after cervical cord section, 484.
STILES, P. G. See BULGER and STILES, 430.
Stomach mucosa, response of, to atropine, 469.
—— ——, —— —— to gastrin bodies, 454.
Strychnine, action of, on epinephrin secretion, after cervical cord section, 484.
SUITSU, N. See HAMMETT, PATTEN and SUITSU, 588.
SUTTON, JR., J. E. See DRESBACH, SUTTON and BURBAGE, 188.
Sweat of man, excretion of red pigment in, 199.

TEMPERATURE coefficient of flash in firefly, 536.
Tetany, parathyroid, muscular tremors, clonic and tonic spasms in, 187.
THACHER, C. See FORBES and THACHER, 177.
Throat infections, excitation of, 184.

UREA and phosphate excretion by kidney, 449.

VAGI and splanchnic nerves, rôle of, in shock from abdominal operations, 197.

Vascular reaction to epinephrin in perfusates of various H-ion concentration, 199.
Vegetables, gastric response to, 332.
Vitamine deficiency, effect of, on various species of animals, 530.

WEIL, G. C. and C. C. GUTHRIE. The blood in clinical shock, 194.
WHIPPLE, G. H. See DAWSON, EVANS and WHIPPLE, 232.
WHIPPLE, G. H. See HOOPER, SMITH, BELT and WHIPPLE, 205.
WOLF, M. See SHERWIN, WOLF and WOLF, 202.
WOLF, W. See SHERWIN, WOLF and WOLF, 202.
Work under rhythmic and arhythmic stimulation, 430.

XEROPHTHALMIA, production of, in rabbit, 530.
